Microcredit outreach, along with micro-insurance, witnessed steady growth in the third quarter of 2015, whereas, active savers were unable to sustain the same growth as shown in the previous quarters.

The gross loan portfolio (GLP) of the sector touched PKR 85 billion by the end of September, 2015 – registering a growth of 4.9%. The increase in GLP can be attributed to growth in the number of active borrowers (3.6%), coupled with an increase in average loan size (5.7%). Growth in microcredit was mainly driven by the MFB peer group, which added 65,000 new borrowers and a portfolio of worth PKR 3.1 billion. Tameer and NRSP Bank were the largest contributors among MFBs who added 18,500 and 16,300 new borrowers respectively. Moreover, Tameer surpassed Kashf to become the fourth largest provider of microcredit (in terms of active borrowers). Among the non-bank MFPs, NRSP was the strongest contributor to microcredit whose active borrowers increased by 16,200 and the portfolio by PKR 286 million. The growth of NRSP was motivated by the agriculture sector, primarily on the back of loans distributed for the harvest of cotton which starts in July. Overall, sector PAR (>30 days) deteriorated slightly from 1.3% to 1.6%, primarily within the MFI and RSP peer groups.

On a less positive note, the number of active savers consolidated from 14.4 million to 13.4 million, while the value of savings remained stagnant at PKR 53.6 billion. MFBs saw the largest reduction in the number of savers among peer groups, primarily on the back of Tameer, whose deposit accounts have contracted by 25% (1.9 million) in the current quarter. The contraction in the deposit base was primarily due to the closure of dormant/inactive mobile accounts. Despite the decrease, Tameer continues to hold the largest market share in terms of both, active savers (44%) and value of savings (28%). Waseela, on the other hand, witnessed a significant increase in the number of depositors (by 1.0 million), due to a surge in mobile wallet accounts. Resultantly, Waseela has surpassed NRSP to become the second largest provider of active savers (standing at 2.3 million). The market share of urban savers declined from 69% to 63% in the current quarter - primarily influenced by the Tameer whose depositors mainly belong from urban areas

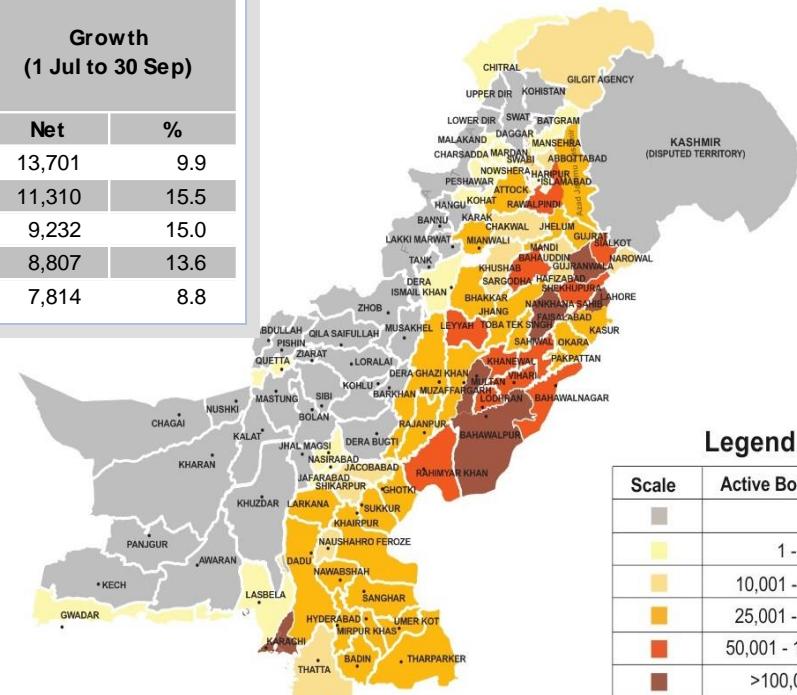

Micro-insurance also exhibited a positive trend in the third quarter of 2015 – policy holders increased by 3.8% while the sum insured depicted growth of 4.4%. Growth in micro-insurance was also driven by the MFB peer group, as most banks offer built-in micro-insurance product to every credit client. NRSP Bank and Tameer were the major contributors to micro-insurance whose policy holders increased by 29,400 and 24,700 respectively. It is pertinent to mention here that Tameer also offers a health insurance product (Khushaal Beema) to mobile wallet customers based on the customers saving balance. Akhuwat and TRDP were the greatest contributors among non-banks MFPS, each adding 20,800 and 19,900 policy holders respectively. The share of credit life policy holders increased by 2% in the current quarter from 48% to 51% - mostly owing to the increase in policy holders by MFBs.

The penetration rate of the sector has increased from 12.8% to 13.3% due to an increase in overall outreach. Geographically, the number of districts covered remained the same - currently standing at 98, while the total number of branches has increased by 31. Akhuwat, ASA, and RCDS have increased their outlets, primarily in the provinces of Sindh and Punjab

Saving Methodology:

- Intermediation:** Public deposits used to finance an organization's loan portfolio. Only SBP-regulated MFPS (CFIs and MFBs) can accept and intermediate deposits from the general public.
- Mobilization:** MFPS not regulated by SBP (MFIs, NGOs, RSPs) can neither hold nor intermediate deposits from the general public. These organizations do however mobilize savings from their members/clients to place with licensed commercial banks.
